Indian's
Agricultural Crop
Production(1997-
2021)

India's production of food grains has been increasing every year, and India is among the top producers of several crops such as wheat, rice, pulses, sugarcane and cotton. It is the highest producer of milk and second highest producer of fruits and vegetables

It also accounted for about 25% of the total quantity of cotton produced, besides being the second highest exporter of cotton for the past several years.

In 2013, India contributed 25% to the world's pulses production, the highest for any one country, 22% to the rice production and 13% to the wheat production.

It is the source of food and fodder.

It is the primary activity of the nation. It provides employment opportunity to the rural agricultural as well as non-agricultural labourers.

It also plays an important role in international business in import and export .

For improving the production, land reforms are the first and predominant point. Machines, tractors, and implements do land reforms.

These machines have the qualities that make rugged farming areas smooth to work on the field efficiently

Working on the field is easy, that means an improvement in productivity is easy. Land reforms are the best method to increase production.

Agriculture is the practice of cultivating natural resources to sustain human life and provide economic gain.

It combines the creativity, easy, that means an improvement in productivity is easy.

Agricultural is called the backbone of Indian economy because 70% of Indian population are engaged in agriculture and raw material for the Industrial sectors like food processing company, textile industry comes from the agricultural sector

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
